EP1550-0-NLW-100 kHz SERIES

Eblana's NLW series has become the industry standard in monolithic, ultra narrow linewidth laser diodes in the near infrared.

Built on Eblana's Discrete Mode technology platform these lasers are the ultimate solution where the highest spectral purity must be delivered in the harshest environmental conditions.

- Standard linewidths down to sub 100 kHz
- Monolithic design without external cavity
- Tunable by either temperature or current
- Low sensitivity to mechanical vibration
- Injection locking versions available
- Wavelength may be specified to custom value

KEY PARAMETERS

The EP1550-0-NLW-100 kHz product series delivers precise narrow linewidth in a fiber coupled 14-pin Butterfly with optical isolator.

- Linewidth < 100 kHz
- Tuning Range = 2 nm
- SMSR = 40 dB (typ)
- Optical Isolation > 55 dB
- Power in fiber = 5 mW
- RIN = 160 dB/Hz

Why Choose Eblana
Delivering high performance lasers for over a decade.
Single Mode Laser Diodes from 689 to 2350 nm.
Discrete Mode (DM) technology enables new & exciting mass market applications.
Expertise always on hand to assist in custom laser design.
