Ball End and Flat End Long flute foam cutting router bits

These long series foam end mill and ball nose router bits are widely used with robot milling machine and huge CNC router which used to cut molds from EPS foam, polyurethane foam, eva foam, plastic, etc.

The long foam cutting tools are great for extended reach machining, deep foam cutting, sculpting big items, cnc routing foam. They are helpful mills for building cnc foam moulds, boat building and for advertising signs making.

Long Foam Milling CNC Tools Features

1. High Speed Steel (HSS) hardness: HRC 61-64.5°
2. Sharp spiral blade for clear smooth finishing (4 flutes or 6 flutes or 8 flutes)
3. Extended Reach for deep foam cutting, carving and milling
4. Foam milling bits size could be DIY customized

 RICO CNC

Ballnose Foam Router Bits

Foam Cutter Bits

Diameter: 6mm, 8mm, 10mm, 12mm, 16mm, 20mm, 25mm, 30mm, 32mm, 40mm, etc.
