  - HHC X9 PRO
  - HHC X8 PRO

MS130K

Maximum image size 1920 x 1080 and 2000 fps recording speeds.

Typical uses are 1080P high definition or wide format high speed applications from 1000 fps to 50,000 fps.
Maximum image size is 1920 x 1080 with recording speeds of 2000 fps at full resolution. | Comes with standard 32 GB on board memory storage.

“F” mount optical interface. | The high speed image files are recorded in a circular buffer ready to be downloaded after the high speed capture ends.

Out-puts live pre-view images back to the control PC while recording to the cameras internal high speed RAM. | Gig E ready.

Maximum CAT 6 cable length is 300 ft from the camera to the control PC. | Available with fibre optic interface for PC connections out to 60 KM.

Can be used with most “stand-alone armed” applications without a control PC connection. | Typical uses are 1080P high definition or wide format high speed applications from 1000 fps to 50,000 fps.

Maximum camera speed is 150,000 fps. | The minimum image size is 1920 x 8.
