

## Diffuse

## Minidiff Plus

### Diffuse Reflectance Accessory for FT-IR Spectroscopy

The Minidiff Plus diffuse reflectance accessory is designed for routine sampling. High performance solids analysis is made simple through the optimised zero alignment optics and Benchmark baseplate mounting system. Sampling versatility is maintained through the choice of either standard solids cup or Diabrase abrasive sampling pads. Up to 3 samples can be loaded at the same time, while the sample introduction system reduces the risk of sample spillage.

#### Key Features

- **Zero Alignment**  
Completely pre-aligned with simple sample introduction / removal
- **Optimised Throughput**  
Designed for a high throughput on all FT-IR spectrometers
- **Maximum Versatility**  
Sample cups for powders and Diabrase sampler for non particulate solid samples
- **Budget Cost**  
Cost engineered to meet the budget of all laboratories

#### Ordering Information

GS04510 Minidiff Plus Diffuse Reflectance Accessory  
Includes: Optics system with Benchmark baseplate, abrasive sample holders (2), sample cup holders (2), Diabrase abrasive pads (20), KBr powder (50g) and pestle and mortar.

#### Please specify spectrometer make and model

GS04505 Spare sample cup holders with 3 cups (2)  
GS04506 Spare packet of Diabrase sampling pads (100)  
GS04508 Spare abrasive sample holders with 3 pads (2)  
GS03610 KBr powder (50g)  
GS03600 Pestle and mortar
