Ultima Expert LT

High Performance ICP-OES at Affordable Price
HORIBA Scientific develops and manufactures high performance ICP-OES spectrometers for more than 35 years. The new Ultima Expert LT provides high performance at affordable price for laboratories with challenging samples.

Ultima Expert LT integrates high efficiency Jobin Yvon optical design capable to achieve optimal performance for a large variety of sample types and matrices. Ultimate Expert LT is driven by the powerful Analyst software featuring a large variety of analytical functionalities for tailored control and analysis.

The robustness of the Ultima Expert LT makes it ideal for applications common to mining, chemicals manufacture, salt production, wear metals in oil analysis, petrochemical and metallurgical production.

Gain in performance with the Ultima Expert LT for your most challenging applications!

**Designed for Challenging Applications**

**Ultima Expert LT**

**Superior Performance in ICP-OES**

**Unique Plasma Torch Design for Most Versatile and Accurate Analyses**

Ultima Expert LT uses a unique plasma torch design with radial viewing mode to allow viewing of the entire normal analytical zone. The vertical torch, the original sheath gas device and the wide injector enable the Ultima Expert LT to handle difficult matrices, with robust operation and minimal maintenance.

Ultima Expert LT ensures the lowest detection limits even with the most challenging samples, such as high salt content, brines, dissolved solids and complex organics.

Its water-cooled high efficiency 40.68 MHz solid state generator enhances the ability to handle a large range of samples, reduces warm-up time down to 15 min, and improves stability and reliability.

All these features make the Ultima Expert LT the most versatile, accurate and robust ICP OES spectrometer available.

**High Resolution and Full Wavelength Coverage**

Ultima Expert LT delivers the highest resolution with less than 5 picometers for the UV range and less than 10 picometers for the Visible range. Such resolution can be achieved due to the unique optical design of the Ultima Expert LT, which integrates a high density holographic grating and one meter focal length optics.

Full wavelength coverage from 160 to 800 nm is offered to satisfy all the requirements for elemental analysis. Optional Far UV kit is available to extend coverage down to 120 nm for halogen elements analysis.

High resolution and excellent sensitivity allow elements with high, low and trace concentrations to be measured accurately, giving you maximum confidence in your results.

**Easy to Handle, Easy to Maintain**

Spacious compartments for sample and plasma are designed to facilitate sample handling.

Quick release, fully demountable torch with no adjustment required facilitates multi-user operation and provides excellent reproducibility.

**Powerful Software with Advanced Features**

ICP Neo software for HORIBA Scientific ICP-OES spectrometers is designed to facilitate method development, samples measurements and results management.

ICP Neo delivers powerful tools for samples measurement with new HDD mode integrated for standard measurement, advanced Quality Control Protocols and retrospective analysis with respect to the integrity of raw results to match with good laboratory practices requirements.

Standard Configuration

- **Generator**: Radio-frequency, solid-state 40.68 MHz, water-cooled
- **Spectral range**: 160 – 800 nm
- **Spectrometer**: Thermally stabilized, 1 meter focal length with 2400 g/mm grating used in the 1st and 2nd order
- **Resolution**: <5 pm for 160-320 nm and <10 pm for 320-800 nm.
- **Plasma torch**: Fully demountable torch with 3 mm i.d. alumina injector and quartz tubes
- **Sample introduction**: Concentric glass nebulizer and glass cyclonic spray chamber, 3 channel peristaltic pump

Facility requirements

- **Dimension (wxdxh)**: 1696 x 698 x 604 mm
- **Weight**: 205 kg (452 lb)
- **Power supply**: Single phase, 220-240 V, 50-60 Hz, 4 kVA
- **Environmental**: 20 to 80 % humidity, 18-24°C at ± 2°C
- **Argon**: 99.995 % purity
- **Nitrogen**: 160 to 190 nm, 99.999 % purity;
  120 to 160 nm, 99.9995 % purity
- **Exhaust**: 250 m³/h (150 cfm)

Options

- **Instrument**: Dual back-to-back gratings (4320 g/mm and 2400 g/mm) used in the 1st order offering resolution < 6 pm for 160-450 nm and < 10 pm for 450 - 800 nm.
- **Far UV kit**: to extend measurement capability down to 120 nm for halogen elements analysis
- **Accessories**: Autosampler AS-500 with optional rinse station
  Argon humidifier
  Introduction system kits for improved performance (small volume, organics, Hydrofluoric acid, high total dissolved solids)
  Concomitant Metals Analyzer for simultaneous measurement of hydride forming elements and other elements
  Oxygen kit for alkali elements in organics
