

Spark, Flame, FireStorm

Ultra High Energy kHz Diode-Pumped Lasers

**NEW
PRODUCT**

Key Advantages

- > Low cost of ownership
- > Easy to use
- > Extended range of energy and tpulse parameters
- > Designed by experts in laser technology

Spark, Flame an Firestorm belong to a family of high-energy and high rep rate solid-state lasers based on master oscillator power-amplifier architecture. One preamplifier and two stage power amplifier provide up to 50 mJ in a single pulse creating a laser system with unique parameters.

Main Features

- > MOPA arhitecture
- > Unique combination of up to 100 mJ pulse energy, TEM00 mode and 1-kHz rep rate
- > High repetition rate
- > Exelent beam quality
- > High pulse energy of up to 100 mJ

Target Applications

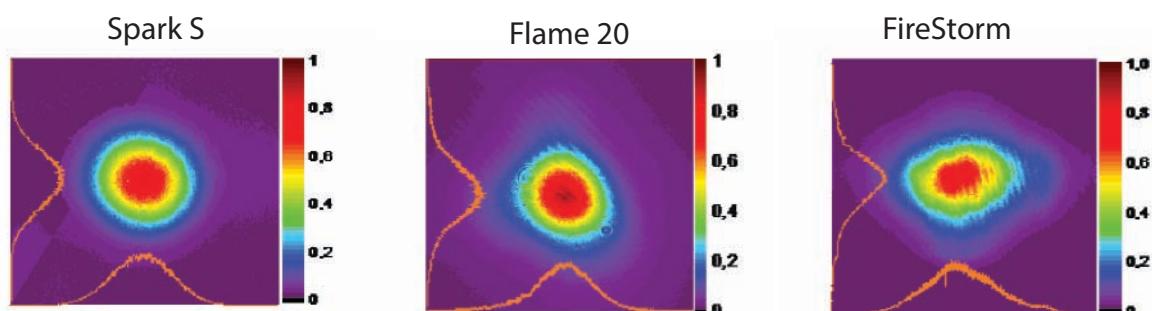

- > Biomedical Research
- > Materials Processing
- > Mid-IR OPO/OPA pumping
- > Nonlinear Molecular Spectroscopy
- > High-energy Laser pumping
