1500W handheld laser welder-White

\$ 8500.00 ~ \$ 8800.00/unit
1/unit (Min. Order)

Product Code:
WSS-HW-CW-1500W

OEM:
Available
Sample:
Refuse
Port:
shenzhen port

Payment:
T/T
Place of Origin:
China

Shipping:
Support Express · Sea freight · Land freight · Air freight

Supply Ability:
200 unit per month

Quick Details

- Product name:
Handheld fiber laser welder
- Controlling System:
Built-in English version
- Power supply:
1500W : AC 220V
- Output laser power:
1500W /2000W (optional)

- Power adjustment range:
5~95%
- Laser Type:
Fiber laser
- Laser wavelength:
1070nm±5nm
- Welding depth:
≤1.8~4.0mm
- Service life of laser module:
> 100000 hours
- The length of fiber:
10m
- Pulse width:
0.3-20ms
- Pulse Frequency:
0.5 -100HZ
- Dimensions:
60*120*130cm

1500W handheld laser welder

1. Continuous output: high electro-optical conversion efficiency, long laser life

2. Maintenance: Maintenance-free, regulation-free, low energy consumption, no consumables. Users can save a lot of processing costs after long-term use. Traditional solder, like argon arc welding and other ways, solder, iron wire, salt, acid etc, needs a lot of consumables energy consumption

3. Size: small size, compact structure, built-in water cooling, flexible and convenient hand-held welding. Outdoor welding can be realized.

4. Easy operation: The operation is simple and easy to learn, and novice can also operation well. Choosing the handheld optical fiber laser welding machine can be easily solved the proble under the current situation that it is difficult to recruit skilled workers and the wage cost is multiplied.

5. With high working efficiency: Traditional identification welding adopts soldering, argon arc welding and other methods, with low efficiency. The workers tend to fatigue when operating. The handheld optical fiber laser welding machine breaks through the traditional practice and its efficiency 10-15 times faster than the ordinary welding words.

6. Handheld Welding: Equipped with 10m imported optical fiber, the machine can realize welding at any angle for workpieces with various complex welds and large workpieces with irregular shapes

Handheld Laser Welder

- **Adjustable** laser spot size
- **Long** standby time
- **High speed** welding
- **Easy** operation

SUNRISE LASER

Features

High Working Speed

Compared with traditional welding like TIG welding, the handheld laser welding machine welds 5~10 times faster.

Easy Operation

New worker is able to weld after a-few-hour learning, saving time and cost on labor and training.

Maintenance-free

No much maintenance. It can work for 24 hours per day, ensuring the production capacity of factory.

SUNRISE LASER

Application

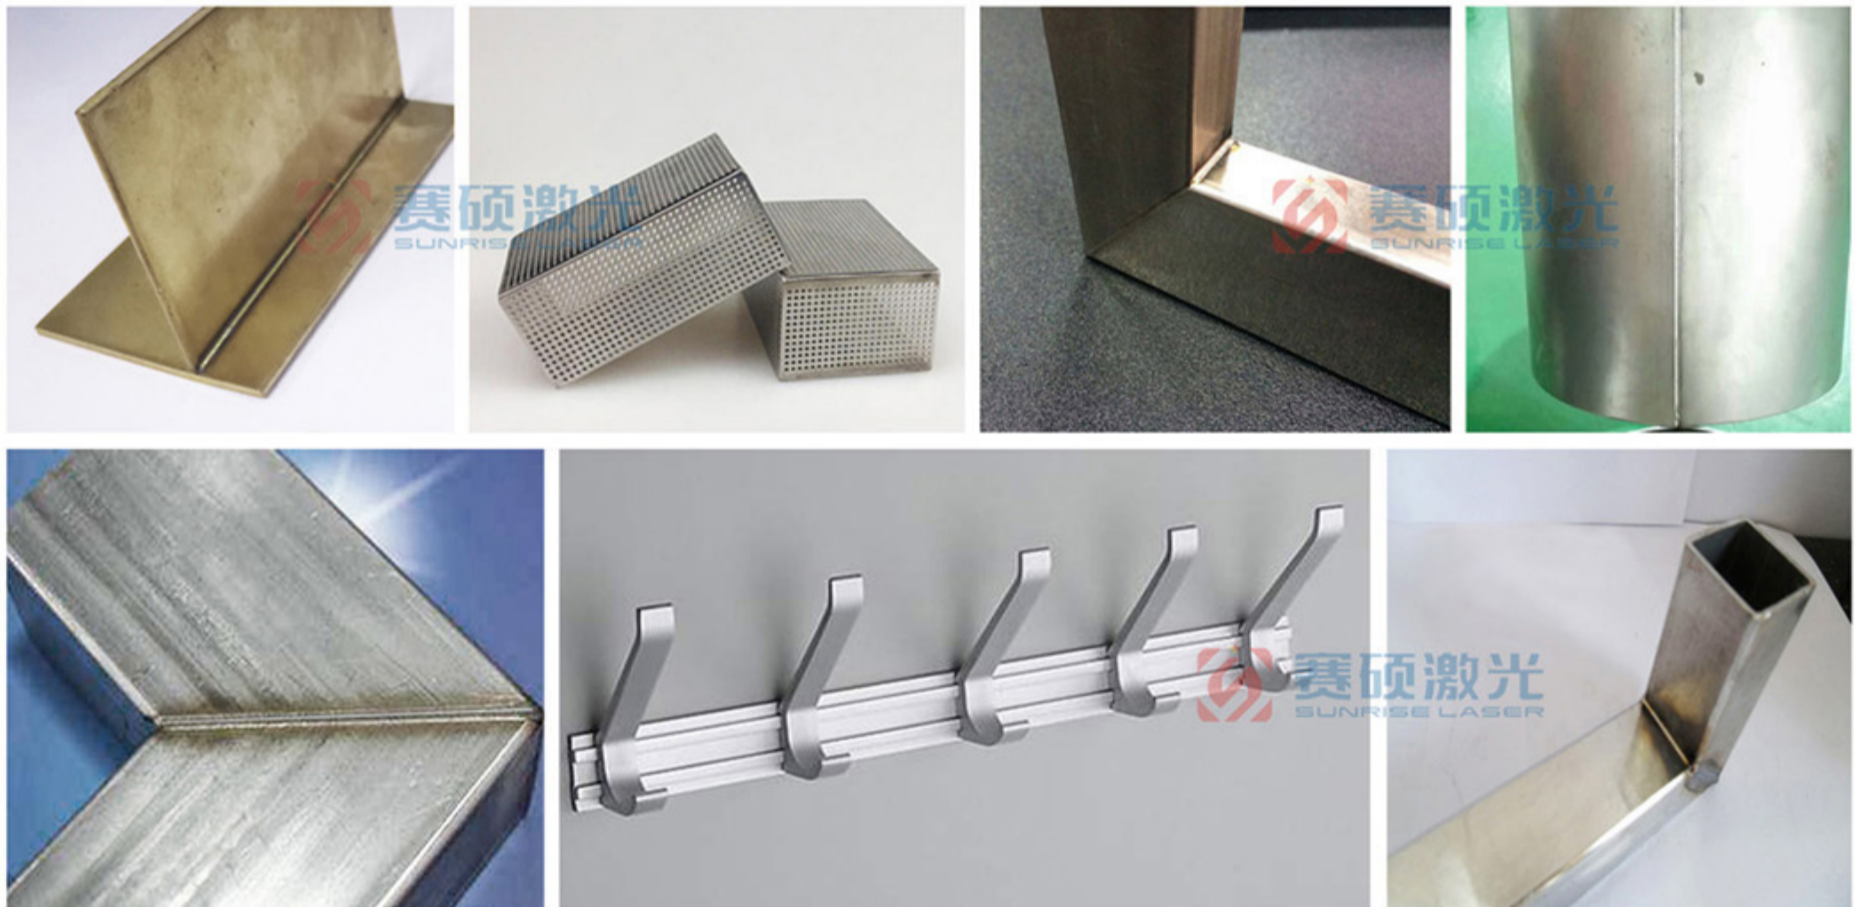

Applicable Industry:

This series laser welding machine is widely used in kitchen industry, household appliances, advertisement, module industry, stainless steel windows and doors, handiwork, home supplies, etc.

Applicable Material:

stainless steel, iron, carbon steel, galvanized steel, aluminum, etc

SUNRISE LASER

Machine Details

—— Sunrise Laser customized software

—— Top brand fiber laser source

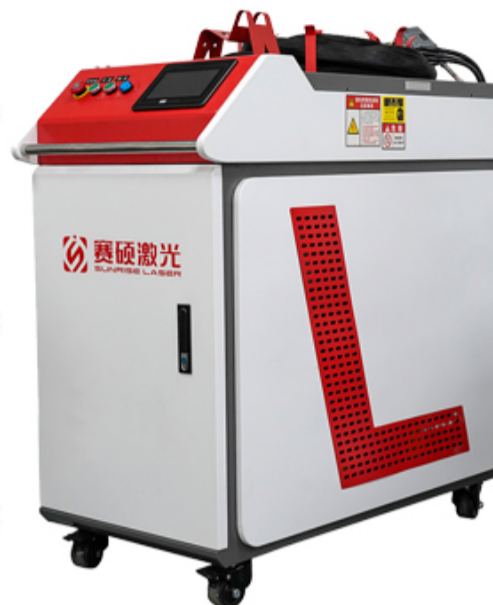

— Intelligent water chiller

Independent design welding gun

Thickening integrated cabinet

Movable for flexible welding
