Commercial convex lenses

Description

These low-cost commercial-grade lenses are suitable for teaching and experimental work, and as condenser magnifiers etc., where high quality is not needed. Some variation in dimensions and focal lengths may occur, please phone to discuss before using these lenses in any production environment.

[Specification](#) [Options](#) [Sets with special pricing](#)

Dimensions Nominal

Material Float glass or B270 See optical materials for details (<http://comarnew.realnet2000.co.uk/technical/optical-materials>)
