## Description

## Description

The Eagle Plasma 2×2 CNC plasma cutting table series includes a water pan, slates. Unit is kit comes un-assembled raw metal will need cleaning.

## 2×2  CNC plasma table Bench Top or Build your own table.

The 2×2 Bench Top CNC plasma table is a small heavy-duty CNC table with a built-in water pan.  This 2×2 also comes with the Carriage kit   Make it your own. The built-in pan can be joined with another 2×2 base pan, which allows you to make 2×4, 2×6, 2×8 and 2×10.

This is a robust machine and was designed with high-end components that are built into a small machine footprint. The design goal for this plasma table was to equip our customers with a small CNC plasma machine that has production-grade components. The result is a small portable high-end CNC cutting table that could be used at your job site or on a bench top.

Call us from 7 am to 10 pm Central Time 7 days at 870-427-2421 training line. We will be there to help. Training is by phone with the use of a remote computer connection. We will see your screen or you can see our screen. Training is responsive to your needs… you set the pace. We have found learning is best when the student is the one controlling the computer, and the teacher's pointer appears on your screen to show what to do next!
