

Alumina Ceramic

氧化铝陶瓷

氧化铝陶瓷：92%，96%，99.7%

硬度高且良好的机械强度

优异的电气绝缘性

高频损耗

良好热导率

耐高温，耐腐蚀，耐酸碱

Purity: 92%, 96% and 99.7%

Good mechanical strength

Excellent electrical insulation

High-frequency loss

Good thermal conductivity

Heat, wear and corrosion resistance.

广泛应用于汽车零件，石油化工，流体控制，物料输送，机械工业，电子电气和半导体等领域；

Alumina is the best-known advanced ceramic material, is widely used in automotive, petro-chemical, fluid control, material transfer, Industry, electrical and electronic, semiconductor.

Sapphire is single-crystal alumina.
