Lenox Borescope Products

Autoscopes

Developed in the mid-1980's, the Lenox Autoscope is a very affordable, (starting at less than \$1,000.00) portable battery powered borescope for individuals and organizations involved with servicing of automotive, truck, and small marine and aviation engines. This optical diagnostic tool lets mechanics inspect diesel and gasoline engines, engine cylinders, valves, manifolds, fuel injectors, carburetors, radiators, and body panels without major disassembly, giving them a bright clear magnified image of potential problems. Automotive, truck, marine and small aircraft service departments use the Autoscope to boost service department profits, help them save time and money and improve customer relations by diagnosing problems quickly. The units have also been used as an inspectio

Autoscope provides a probe diameter of either 6 mm or 8 mm, field of view of 70 degrees, focus from 1/4 in. to infinity and working lengths of 9 inches to 15 inches. An optional angled viewer accessory is available at modest cost. The complete visual diagnostic kit includes eyepiece and probe with internal lens and light system, battery pack, battery extension cord and storage/carrying case.

Item #	Item Name	Outer Diameter	Working Length	Direction of View	List Price
6700K-900	Autoscope Kit - 6.0 mm Dia., 9" Length w/Right Angle Viewing	6.0 mm (.236")	9"	Right Angle	Quote
6700K-1200	Autoscope Kit - 6.0 mm Dia., 12" Length w/Right Angle Viewing	6.0 mm (.236")	12"	Right Angle	\$1,875.00
6600K-900	Autoscope Kit - 8.0 mm Dia., 9" Length w/Right Angle Viewing	8.0 mm (.315")	9"	Right Angle	\$1,178.00
6600K-1500	Autoscope Kit - 8.0 mm Dia., 15" Length w/Right Angle Viewing	8.0 mm (.315")	15"	Right Angle	\$1,783.00
