BB 2.0 Series

Penetrant resistant,
Powerful, handheld UV light
that produces the largest
beam from any handheld
light, useful for covering
large areas, widely used
either in the field, on an MPI
bench or a penetrant line.
All BB 2.0 Series models
carry an IP68 certification.

[Overview](#)

[Description](#)

[Features](#)

[Additional
information](#)

BB 2.0 Series products, Artemis, Helios and Ikaros are lamps with a powerful and wide UV output. Eight high quality LEDs, with white light block filters that do not suffer from solarization, provide a large coverage, in excess of 10 inches / 26 cm, and weigh less than many comparable products. The mains operated model weighs just 1.2 kg (2.6 lbs) and the battery-operated model (DUO) weighs just 1.7 kg (3.7 lbs). They are widely used for field inspections or on an MPI bench. All BB 2.0 Series models have an ingress protection certification of IP68.
