OVERVIEW

The world's highest quality capture card, DeckLink HD Extreme features the maximum possible quality capture and playback. With Dual Link 4:4:4 and the new 3 Gb/s SDI connections, DeckLink HD Extreme works in SD, HD and even 2K. DeckLink HD Extreme switches between SD and HD SDI, HDMI and analog component. With Dual Link 3 Gb/s SDI built in, DeckLink HD Extreme can support 4:4:4 and real time 2K capture and playback. With higher speed 4 lane PCI Express, DeckLink HD Extreme supports full HD keying, 2K film and 1080p video formats. Also included is 2 ch of balanced XLR audio, 2 ch of AES/EBU digital audio and support for Windows™, Mac OS X™ and Linux™ computers. Get all the power of film and HD editing at the highest quality possible.
