Lenses

Our in-house team of designers and optical technicians can create bespoke moulded lenses ranging in size from Ø5mm to Ø80mm.

Through a state of the art manufacturing process we have the capability to produce geometric shapes such as spherical, aspheric, toroidal and elliptical.

Should you require a higher accuracy moulded product, our precision lenses can be tooled to a consistent profile accuracy of <5 microns.

Our lenses are available in the following materials:

- LIBA2000 nd=1.521
- SIMAX borosilicate nd= 1.472
- F2 nd= 1.62
- Coloured glass

Applications:

- Light condensing
- Imaging
- Sensing
- Detecting
- Light curtains
- Illumination
- Signage
