CUSTOM LAPPING AND POLISHING

Although a large part of our business is aimed at optical applications such as laser quality

+44 (0)1767 600877

MENU 

alignment aids for scientific instruments.

If you have a need for extreme precision, please send us an enquiry. We welcome the challenge of developing process methods for lapping and polishing new materials. We have supplied lapped and polished parts for fibre optic connectors, medical implants, Formula 1 racing, nuclear installations and the food industry.

“

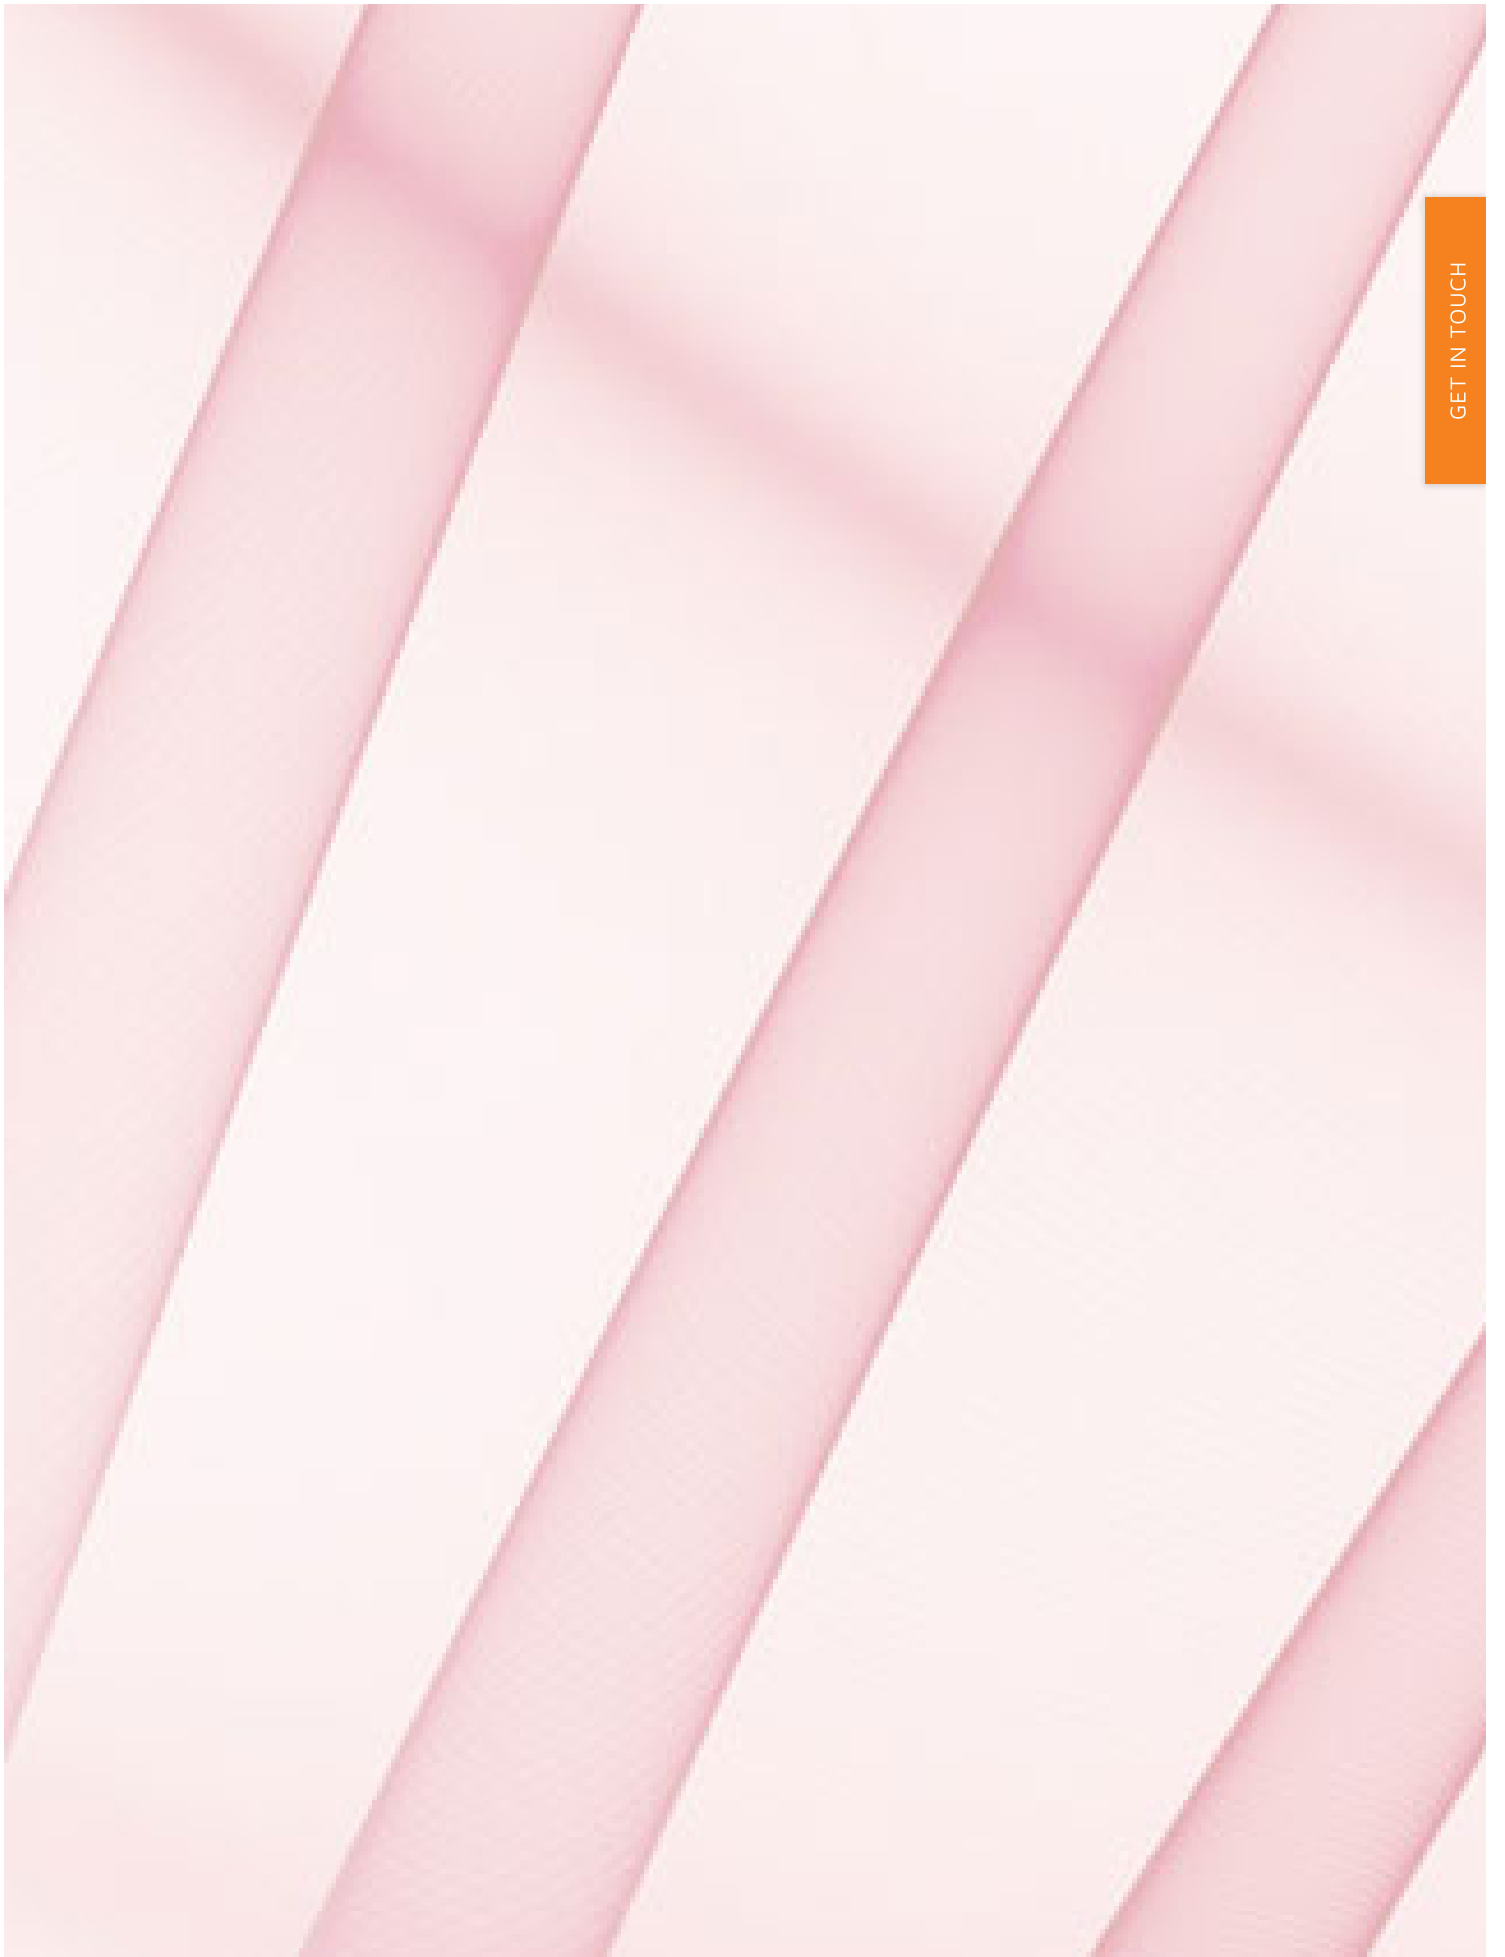

The surface finish is a dramatic improvement to previous methods we have used. We really appreciate the help Mark and LBP Optics have given us.
