Customer Projects – QualiVision for Peace of Mind

QualiVision is a technology and consultancy company delivering customised automation solutions. We are part of Baumer Group, a leading manufacturer of precision sensors, angular sensors, process measurement technology, glue application and image processing solutions. Our engineers provide responsible, targeted and prompt customer support for every project stage, from initial ideas via feasibility studies to eventual implementation. Quality, flexibility and profitability are top priorities. We take charge of the system and implement projects based on partnership and cooperation between all participants. Modular and standardised solutions ensure maximum investment protection.

QualiVision Developments

Our international network of experts and suppliers develops sophisticated automation solutions in cooperation with customers.

We offer our customers optimal solutions based on our in-depth knowledge of image detection and analysis processes up to machine integration. Baumer Group employs more than 100 hardware and software engineers specialising in optical sensors and machine vision.

We look forward to offering you the benefits of this powerful combination of experience and expertise.

Our services:

- Preliminary design, feasibility studies
- Project planning, implementation and start of operation
- Customer-specific software development including algorithms, statistics, interface integration, protocols etc.
- Customer-specific visual effects and illumination

“Key to our success is the ongoing development, modularisation and standardisation. This allows us to promptly supply innovative, reliable and flexible solutions.”

Maintenance and continuing development

Michael Czerny, Head of
Development
