

## Design-Build

- Prototype new concepts in real time, using off-the-shelf components whenever possible
- Design and integrate custom optics, lasers and mechanisms for quick-turn delivery in days or weeks
- Assign accountable project manager & create requirements document
- Assemble hardware & software in a controlled environment
- Full documentation available including models, prints, manuals, and source code for select projects
- Perform acceptance test, deliver, and install at your facility
- Warranty service and support contracts
