## Domino

In-one 2D/3D laser machine with a unique application flexibility: flat, three-dimensional, bevel, tubes cutting, and welding.

DOMINO® is a laser machine designed for today's industrial requirements for flexibility, productivity, efficiency, and quality.

A single machine cuts and welds flat sheet and three-dimensional parts, performs bevel cuts for the weld preparation and processes tubes and profiles.

DOMINO® is a high capacity 5-axis machine with the high dynamics of a 2D machine, a considerable work volume, and an extremely reduced footprint.

The direct-drive head is highly dynamic and accurate, ensuring excellent cutting quality even on thick sheets. Thanks to the rapid tool change system, it can be easily reconfigured to suit all types of processing.

## Highlights

compact design for minimum footprint and easy transportation and installation

synthetic granite frame for best thermal stability and vibration damping

maximum accessibility to the machine

CO<sub>2</sub> laser up to 4,000 W manufactured by Prima

Electro: wide range of thicknesses up to 25 mm and the best efficiency for a CO<sub>2</sub> laser

direct-drive head featuring high dynamics, accuracy, and quality of movements

collision protection system and no-backlash and no-wear direct-drive technology reducing maintenance costs and times

- two focal length lenses (5" and 7.5") and fast-tool replacement system for easy changes of production
- F-axis for controlling the focal position independently of the Z-axis
- SIPS (Safe Impact Protection System) protecting the machine head in case of collisions with workpieces or fixtures
- CNC P20L with Windows HMI, 15" Touch screen, Trackball, Tables On Board
- optional rotary axis, tubes and profiles can be processed with zero set up times
- wide range of modules for material handling and storage automation

## OUR BRANDS

When it comes to the quality of the finished product and the efficiency of the manufacturing process, having the right tools makes all the difference.

## IMTS MACHINERY

### Technical Excellence, Innovative Products

IMTS specialize in high-quality industrial laser and sheet metal equipment servicing Australia and New Zealand. Established in 1994, we saw a need for a talented service company to assist the sheet metal industry and, 20 years later, our commitment to after-sales service continues to be the cornerstone of our business.

## NEWS

### Success for Prima Power at EuroBLECH

Participating prominently in the EuroBLECH exhibitions and prior to that in BLECH since 1980's, Prima Power describes this year's event as the most successful one ever for the company.

"Compared with major exhibitions during the past few yea..."
