

Dove Prism

Dove prism is always used to rotate image. If you rotate the prism around a longitudinal axis, the image rotates through twice the angle the prism rotates through. Sometimes, dove prism is also used for 180deg reflection.

Attribute	Specification
Material	N-BK7, Fused Silica,etc
Dimension Tolerance(mm)	+0.0/-0.2
Clear Aperture	>90%
Angle Tolerance	<3min
Flatness@ 633mm	1/4
Surface Quality	60/40
Bevel(mm)	-0.1 to 0.5
Coating	Uncoated ,AR Coating, etc
