DESCRIPTION

WI-FI CONNECTIVITY

No matter where you are, share images and send reports instantly from your smartphone or tablet via the FLIR Tools Mobile app, and make critical decisions faster!

FLIR E8XT with improved Thermal Sensitivity

FLIR EX-SERIES FEATURES

Rechargeable Batteries

Quick-release battery is easy to remove, change, and recharge

Fast Download

Rapid image downloading via USB for sharing and documentation

Measurement Accuracy

Variable emissivity and reflected temperature parameters for reliable results

Fast Temperatures

Area box with auto hot and cold spot hunts down extremes in no time

Quick Reports

FLIR Tools software to analyze images and create convincing reports

Warranty

2 years coverage on the camera, 5 on batteries, and 10 on the detector

Value and Affordability

- 2X higher resolution than FLIR E6-XT featuring 76,800 (320 x 240) thermal pixel measurement
- Temp measurement from -4 to 1022 degrees F (-20 to 550 degrees C) with ± 2 percent or 2 degrees C accuracy
- Compact, rugged user-friendly design with vivid 3-inch color LCD display, wide-angle fixed-focus lens, intuitive 1-button controls
- Designed to enhance electrical, mechanical, and building diagnostics for users across key industries and professions
- Non-contact, non-destructive, non-invasive, intrinsically safe for all users providing outstanding ROI

Problems & Solutions

- Electrical Problems — Detect hidden electrical problems like loose connections, faulty wiring, and failing circuits
- HVAC Problems — Discover leaky ductwork and troubleshoot heating, AC, and radiant flooring problems
- Missing Insulation — Locate poor and missing insulation by comparing temperature differences with surrounding areas
- Water Damage — Find and fix hidden water leaks before small issues turn into large, expensive problems
- Air Infiltration — Reveal air leaks around windows, doors, and other building envelope structures
- Mold and Rot — See temperature differences to expose moisture, avoiding extensive damage and health issues
- Destructive Pests — Hunt down burrowing and nesting insects and rodents before expensive damage occurs
