## Factory Automation

We are designing and manufacturing high quality industrial equipment for the factory automation. We offer today the latest technologies, machines and robots for:

- precision assembling
- soldering
- brazing
- welding
- heat-treating even in controlled atmosphere and very-high-vacuum
- laser soldering and welding
- mono and bi-component dispensing and UV curing
- automatic testing
- micro assembling
- quality control by 2D 3D machine vision
- ...

**SINERGO**

All machines are EPA and cleanroom compatible. Our equipment is preferred by many customers in different fields: electronic, electro-

mechanic, semiconductor, optoelectronic & sensors, medical & pharmaceutical, automotive, appliances, aeronautics, defence & space, research laboratory. Our know-how, the trained staff, high flexibility, pre and post sales assistance, and our direct relationship with customers, represent together our company's strong points.
