

FIBRALITE® SERIES

OEM RAMAN FIBER LASERS

FEATURES

- High output power up to 8W
- High efficiency conversion
- Excellent power stability
- ACC and APC operating modes
- RS232 interface
- Maintenance-free
- Compact OEM module
300 x 200 x 35mm

APPLICATIONS

- Distributed Raman amplification
- Remote EDFA pumping
- Fiber optic component testing

Keopsys offers a wide range of OEM Raman fiber Lasers at various emitting wavelengths ranging from 1110 to 1650nm with output power up to 8W.

These products are well suited for distributed Raman amplification, remote EDFA pumping or fiber optic component testing.

Keopsys expertise on double cladding fiber technology and power conversion, enables to propose highly efficient and compact laser sources in a wide spectral range.
