- **Stackable filter holder**
- **Spring clips to hold filters without damage**
- **Mounts to Half-inch Posts**

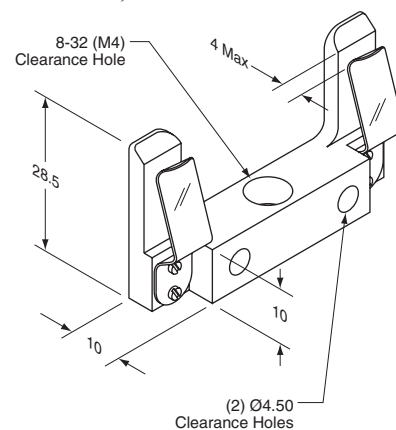

Ealing's post mountable Stackable Filter Holder accepts square 50 mm (2 inch) filters of up to 4 mm thickness. This filter holder is supplied with hardware that enables it to be stacked with up to three identical filter holders. This enables combinations of up to three filters to be held in the same mount.

The stackable filter holder has a central clearance hole for mounting directly to any M4 or 8-32 tapped hardware, such as Ealing half-inch posts, MicroMech™ stages and more.
