Fused Silica & Quartz Windows

Source : Nanjing Sapphire Electro-Optics Co., Ltd Update time : 2016/2/29 22:22:45

This material has good endurance on high temperature, small thermal expansion coefficient and good chemical stability, good transmission rate on UV light and can also be used in visible and near infrared range. They're first-rate window material for general purpose visible application including observing windows in high temperature areas, requiring high stable optical coefficient while working in tough environment, also many applications in military and new technologies.

Specification	
Product Name	Window
Shape	Round, Square, Wedge, Ring, Step
Material	Fused Silica; Optical Glass
Dimension	Φ1mm-Φ200mm
Thickness	≥0.15mm
Tolerance	±0.005mm
Clear Aperture	≥95%
Surface Accuracy	λ/10@632.8nm
Surface Quality	10/5
Parallelism	≤3'
