

Miltec UV- The Power of Excellence.

QUALITY, RELIABILITY, PERFORMANCE.

HPI Gloss Control

Description:

Miltec UV Gloss Control Technology uses our HPI model arc UV lamps to enable manufacturers to achieve a very wide gloss range using a single UV coating. This technology provides exceptional gloss control for producers to meet the ever changing tastes in the market for years to come. Low, medium, and high gloss levels are attainable with repeatable results, and single touch-instant adjustments accommodate varying products. Cost savings are dramatic with reduced downtime for changeovers and maintenance, less energy and parts consumption, fewer coatings required, and improved product quality and consistency. Our innovative equipment is not only cost effective, but also extremely easy to use and maintain, energy efficient, eco-friendly, and performs to the highest demands in production.

Benefits and Features:

- ▶ Achieve specific gloss levels across a wide gloss range with a single coating
- ▶ Fewer number of HPI UV lamps needed, lower energy and operating costs
- ▶ Reliable performance with consistent UV output
- ▶ Repeatable results with easy ability to make instant, easy changes to accommodate gloss levels and varying

- ▶ Easy UV system to maintain with advanced operator interface/controls
- ▶ Variable UV output from 40%-100% in 1% increments
- ▶ Increased cure speed compared to UV systems currently used in production
- ▶ Easy retrofit to replace old equipment
- ▶ Made In USA

Applications Include:

- ▶ Hardwood Flooring
- ▶ Resilient Flooring
- ▶ Cabinetry
- ▶ Panel/Sheet
- ▶ Door
- ▶ Framework
- ▶ Furniture
- ▶ Molding/Profile
- ▶ Trim
- ▶ Window
- ▶ Guitar
