<p>An internal burr viewed through a Hawkeye Pro™ Slim borescope, model PS02, with Laser Video System.</p>	<p>Internal inspection of a cast valve body, showing the machining feed cut through voids in the casting! Hawkeye Pro Slim model PS02 with Laser Video System.</p>		

Pro Slim™ .165" (4.20 mm)

The clarity and brightness of Hawkeye® Pro Slim Borescopes bring out all the details in your subject. The Pro Slim offers the best combination of small diameter, length, and bright illumination. Most machined metal parts afford ample access for the Hawkeye Pro Slim Borescope and mirror tube. You will clearly see burrs and surface finish in bores and cross-holes.

Pro Slim™ .165" (4.20 mm)

Available in either 0° DOV or 30° Prism DOV, the clarity and brightness of Hawkeye® Pro Slim Borescopes bring out all the details in your subject. The Pro Slim offers the best combination of small diameter, length, and bright illumination.

Most machined metal parts afford ample access for the Hawkeye Pro Slim Borescope and 90° DOV mirror tube. You will clearly see burrs and surface finish in bores and cross-holes.

Hawkeye Pro Rigid Borescopes contain:

- Our latest endoGRINs® image relay lenses
- Multicoated objective lens
- LightConcentrator™ light post
- Independent focusing ring for convenient video and still photography
- A Super bright, portable SuperNOVA™ Light, with rechargeable SuperNOVA Lithium-Ion batteries, and a rugged Hawkeye Carrying Case are included with Kit purchases.
