

## High-power diode laser bars: 808 nm, 60 W cw JDL-BAB-50-47-808-TE-60-1.5

### Features

- High laser power
- High efficiency
- Long lifetime, high reliability
- Excellent beam characteristics

### Applications

- Pumping of solid-state lasers and fiber lasers
- Industrial, scientific and medical systems
- Printing industry
- Defense and security

# High-power diode laser bars | 808 nm, 60 W cw JDL-BAB-50-47-808-TE-60-1.5

| Specifications                      | JDL-BAB-50-47-808-TE-60-1.5 |      |              |       |      |
|-------------------------------------|-----------------------------|------|--------------|-------|------|
| Operation*                          | Symbol                      | Min  | Nom          | Max   | Unit |
| Wavelength (cw)                     | λ                           | 803  | 806          | 809   | nm   |
| Optical Output Power                | Pont                        |      | 60           |       | W    |

\* Mounted on a heat sink with Rth = 0.5 K/W, coolant temperature 25 °C, operating at nominal power

\*\* Full width at 95 % power content

\*\*\* Item may change upon notice and acceptance by JENOPTIK Diode Lab GmbH, due to future improvements of technology or processing

Note:Nominal data represents typical values.Safety Advice:Laser bars are the active components in

Laser bars are the active components in high-power diode lasers in accordance to IEC standard class 4 laser products. As delivered, laser bars cannot emit any laser beam. The laser beam can only be released if the bars are connected to a source of electrical energy. In this case, IEC-Standard 60825-1 describes the safety regulations to be taken to avoid personal injury.
