## KL 300 LED Compact and bright

General data

The KL 300 LED is a fiber optic light source with a LED light engine, developed and designed for industrial and life science applications in stereo microscopy and macroscopy.

The brightness is equivalent to a 30 W halogen cold light source.

## Features:

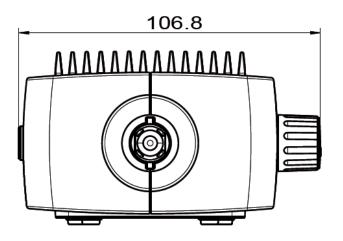

- LED light engine.
- Wide range power supply (100 - 240 V, 50 - 60 Hz)
- International clip plug system.
- Convection cooling (no fan).
- Continuous dimming from 0 to 100 %.
- Mountable direct to microscope
- stands via respective adaptors or usable as stand-alone.
- Wide range of accessories available (KL 300 series).

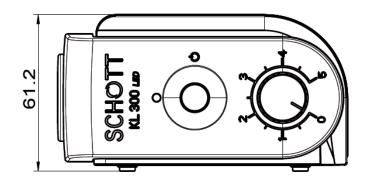

| Part-No.                     |               | 120 300                             |
|------------------------------|---------------|-------------------------------------|
