

# MQU Series Solid-State Lasers

Far field

Near field

## MQU FEATURES & BENEFITS

- ◆ Can be injection seeded for narrow bandwidth allowing pumping source for OPO, Ti:sapphire, dye laser, or for high resolution experiments
- ◆ Laser head can be readily removed for lamp changes and replaced without realignment
- ◆ Incorporates Gaussian optics pioneered by Zklaser® to provide high spatial uniformity in the beam
- ◆ Compact, sealed and rugged designed for maintain free

## NOTES

1. FWHM full width half max
2. Full Diameter for 86% (1/e<sup>2</sup>)
3. 99.9% shots will be <±30 µrads with ΔT room<±3°C
4. Time to reach full energy
5. With respect to external trigger
6. FWHM (1cm<sup>-1</sup>=30 GHz)

MQU Series Solid-State Lasers are the no compromise laser source for applications where energy and beam quality are required. The MQU series is the ideal pump source for OPO's, Ti:sapphire, CPA, OPCPA or dye laser. The Gaussian mirror coupled resonator is optimally mode filled for maximum energy extraction allowing amplification to >10 J / pulse. The Gaussian mirror coupled resonator can be injection seeded for narrow bandwidth.
