Specification Brief

Maximum image size is 1280 x 800 with recording speeds of 4000 fps at full resolution.

Comes with standard 32 GB on board memory storage.

“C” mount or “F” mount optical interface.

The high speed image files are recorded in a circular buffer ready to be downloaded after the high speed capture ends.

Out-puts live pre-view images back to the control PC while recording to the cameras internal high speed RAM.

Gig E ready.

Maximum CAT 6 cable length is 300 ft from the camera to the control PC.

Available with fibre optic interface for PC connections out to 60 KM.

Can be used with most “stand-alone armed” applications without a control PC connection.

Typical uses wide format high speed applications from 1000 fps to 50,000 fps.

Maximum camera speed is 200,000 fps.

The minimum image size is 1280 x 8.
