MX-PRS Series Precision Rotary Stages

Motion X Corporation's **MX-PRS Series Precision Rotary Stages** range from standard to ultra high precision and offer the lowest axial and radial runout, highest accuracy, stiffness, repeatability, load capacity and move and settling times available. Our **MX-PRS Series Precision Rotary Stages** are offered in either recirculating ball bearing or air bearing configurations. A wide range of encoder outputs and resolutions are available. All **MX-PRS Series Precision Rotary Stages** are offered with optional end of travel limit switches, encoder home reference mark/switch and in either brushless direct drive or brushless/brushed/stepper motor and worm gear driven configurations.

Motion X Corporation's line **MX-PRS Series Precision Rotary Stages** performance, flexibility and price is unmatched in the rotary stage market and we invite you to contact our sales department for more information regarding Motion X Corporation's line of **MX-PRS Series Precision Rotary Stages**.
