

Welcome To Soft Automation, Inc.

Integration of Machine Vision, Gauging, Motion Control, SPC, Thermal Imaging, Multimedia, Automation....

"Ready to work for you"

Soft Automation provides integration and consulting services. With a strong expertise in Industrial Automation, Machine Vision and a strong background in software development, Soft Automation Inc prides itself, as a solution provider and systems integrator.

What makes us unique (money)

We can marry many many different hardware / software technologies to build an integrated solution

- 3D imaging
- Automation
- Industrial protocols
- Analogue probes
- Line scan cameras and lasers
- Databases and reports
- Remote control and access
- Experience with many different hardware manufacturers
-

all are tailored to run harmoniously with each other

How We do it

Using an in-house developed automation integration package called Automation Manager, we can bring together a multitude of automation components (software and hardware) into a usable application via a drag drop environment. Please view some of the [case studies](#) or visit the [Product Site - Automation Manager](#)

To view the technology developed in house that lies behind this cross platform environment visit synapx.org

Note

And the crowd were astonished beyond measure, saying, "He (Jesus) has done all things well..."
As Jesus is we strive to be.
