

### NS-LD03: Narrow spectra laser module operating at ~1550 nm

#### Main features include:

- Single mode fiber coupled
- Typical output power of 10 mW
- Narrow spectra, line width <math><0.01\text{ nm}</math>
- >50 dB side mode suppression
- Center wavelength can be tuned
- Built in temperature controller and laser driver

### TS-LD03: Laser module for test and measurement

#### Based on NS-LD03, TS-LD03 features:

- Multiple optical outputs
  - Built in isolator, ideal for transmission/reflection measurement
