glass and glass ceramics, for all your optical glass blank needs. Each type of optical glass is formulated very precisely to have specific optical, thermal, chemical and mechanical properties. To learn more about specific optical glasses and glass ceramics and their properties, check out our Optical Glass Reference Chart. Click here for a list of typical glasses in stock (please note the list is representative and not an actual inventory of material in-house today). AGI works closely with our suppliers to ensure the fastest delivery of optical glasses that we don't have on hand.

OPTICAL GLASS AND GLASS CERAMIC

Optical Material Quality

Optical glasses and glass ceramics are available in a range of grades to fit your application needs and your budget. Advanced Glass Industries pre-qualifies the material prior to manufacturing to make sure that your parts meet your material specifications. To learn more of about quality levels of optical glass, see our
