

## Our coating services

For sample coating curves please email us [info@opticalcoatings.it](mailto:info@opticalcoatings.it)

### Coatings

#### AR coating services

Antireflection coatings decrease reflection to minimum and increase the transmittance through substrate. "Optines dangos" supplies single layer, V-type, broadband, multiwavelength and custom AR coatings.

#### HR coating services

Dielectric high reflective coatings are used to increase the reflectivity of a surface. Single and multiwavelength, broadband coatings are available.

#### Beam-splitting coating services

#### Variable reflecting mirror coating services

#### Metallic mirror coating services

Aluminium, aurum, silver coatings with or without protection are available.

#### Aurum contacts for crystals

Aurum contacts for crystals that are used in Pockels cells.

#### Astronomy filter coating services

### Custom coatings

Our company has the knowledge and experience to design various coatings for Your needs. It's our passion to find solutions for even the most difficult and unusual assignments. For custom coatings and other questions please email us [info@opticalcoatings.it](mailto:info@opticalcoatings.it)

### Latest News

#### New website launched

Optines dangos has launched a new website with a modern design and easy navigation. The new website is available in Italian and English. It contains all the information about our company, our services and our products. It is a great tool for our customers and for our partners. We are proud to present this new website and we hope that it will be a great success.
