Portable LED Light Source

Accessories

Small light source. Huge advantage.

Whether inspecting plumbing lines or aircraft engine internals, cords just get in the way. The Optim Portable LED Light Source (PLS) transforms your fiberscope or borescope by delivering exceptional light intensity and quality in a compact unit that eliminates external light sources and tethers. Bright lighting with precise control is crucial for industrial inspection tasks. Optim provides compact, portable lighting solutions that simplify the task of delivering illumination to hidden areas, facilitating effective and efficient inspection virtually anywhere.

FEATURES & BENEFITS

Integrated design—Connects directly to your fiberscope or borescope, eliminating cumbersome cords. Our integrated approach gives users a new level of freedom and flexibility.

Compact power—Our patented light coupling technology focuses and shapes the light, delivering more brightness where it counts: at the end of the scope. Rechargeable batteries provide power for an entire day of inspections.

Broad compatibility—Compatible with fiberscopes and borescopes from a variety of manufacturers, using industry-standard Storz type thread connection. This offers the flexibility of one light source that can be used with multiple devices.

PLS kit includes: PLS, 2 rechargeable Li Ion batteries, battery charger cradle, power supply, operator's manual.
