Rod Lens

[Return](#)

Rod Lens is designed for use in a variety of laser and imaging applications. The addition of this product line is part of a continued effort to support current trends toward miniaturization.

Unioriental produces kinds rod lens based on different material and sizes. N-BK7 and UV Fused Silica substrates are available. Its circumference and both ends can be polished upon customer requirement. Its optical performance is similar to a cylinder lens, the light passing through the diameter of the rod lens will be focused into a line.

Basic

Features

Product

General specifications

Product Name	Rod lens
Diameter Tolerance	+0.00/-0.02mm
Length Tolerance	+0/-0.1mm
Surface Accuracy	free
Surface Quality	60/40, 40/20 or better
Material	BK7, UV Fused silica ,or customized
Clear Aperture	>90%
Ellipticity	<0.005mm
Coating	Customized
Bevel	Protective bevel as needed
