

AMADA MIYACHI AMERICA

Improving manufacturing through design, technology and innovation

**Sigma Laser Stent
and Tube Cutter Series**

AMADA MIYACHI AMERICA has been providing laser systems solutions to the medical device industry for over 20 years. This third generation of the Sigma Stent and Tube Cutter was designed from the ground up to provide a compact, production efficient system geared toward the operator for ease of use and setup for day in day out use.

As with all of our integrated laser systems, the Tube Cutter comes with our 24/7 service support, and the support of our in-house applications engineers.

Sigma Laser Stent and Tube Cutter Series

All applications for femtosecond and fiber laser cutting are completed in our Technical Center cutting labs.

- 1** Our applications engineers test and select the best laser for the process from an array of femtosecond lasers
- 2** Internal gooseneck lighting for setup and part viewing
- 3** Standard 300 mm x linear stage
- 4** Composite base for maximized vibration isolation and space efficient

Sigma Femtosecond Laser Stent and Tube Cutter

- 5** In-line camera for part and process viewing
- 6** ZY stage set, 50 mm x 100 mm linear stages
- 7** Precision cutting head with highest quality optics to provide minimum spot size of 12 μm (0.0005 in)
- 8** Rotary stage / collet for tube diameters up to 30 mm (1.18 in)
- 9** Nano-particulate extraction
- 10** Proprietary front guide system
