

420 – 700nm Quasi-Collinear Acousto-Optic Tunable Filter

TF560-280-1-5-NT2

AO Tunable Filters for specialist spectroscopic applications.

Gooch & Housego's AOTF capability is extensive. By combining our scientific knowledge, modelling capability and engineering expertise with our renowned manufacturing skill and high quality, our products are aimed at the most discerning customers, in the most demanding applications.

Quasi-collinear design offers narrow wavelength resolution with excellent out of band wavelength rejection and exceptionally low drive power requirements.

In addition to the standard product shown, custom configurations are available for specialised applications. These include alternative mechanical design, wavelength range, aperture & resolution. We also offer temperature stabilisation or compensation options.

Please contact the sales team for further information.

Key Features:

Wavelength 420 to 700nm Narrow resolution High speed, random access Excellent out of band rejection Solid state technology Custom configurations available

Application examples:

Laser tuning Ultra-fast laser systems Fibre systems
