UV Equipment

UVC Ballasts

Our DVG-series electronic power supplies are specially designed to operate Amalgam-low pressure-UVC-lamps. They are suitable for UV-lamps with a maximum lamp power of up to 500 W. Some devices can be used for different lamps and may have additional functions such as dimming or control interfaces.

The newly developed digital control allows precise adjustment of the lamp and therefore, efficient and "gentle" operation.

Features:

- Safe and effective protection circuit
- Improved monitoring of lamp operation
- Gentle pre-heating of coils
- Compact design
- Longer lamp life-time
- Integral counter for hours and switching cycles
- Continuous power adjustment available

For more information on our UVC Single Phase Ballasts, call
508 . 229 . 7774.
