Product Details

Product Details :

Achromatic lenses are cemented with two lenses mainly used to reduced values of spherical aberration, coma and chroma aberration. We offer positive achromatic lenses and negative achromatic lens with coatings.

Optical achromatic lenses is a new type lens, they are widely used in achromatic telescopes, microscopes, and photograph lenses.and we can provide professional customized design.

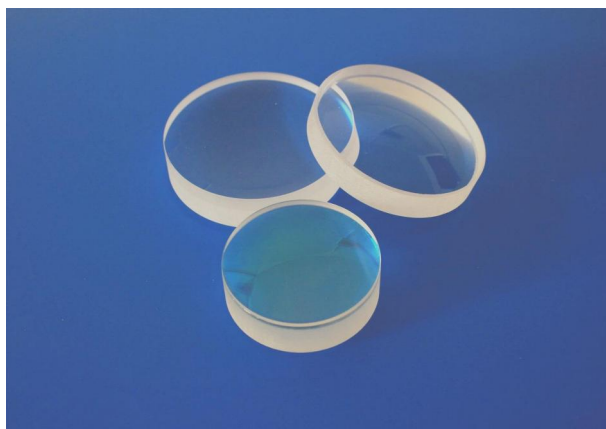

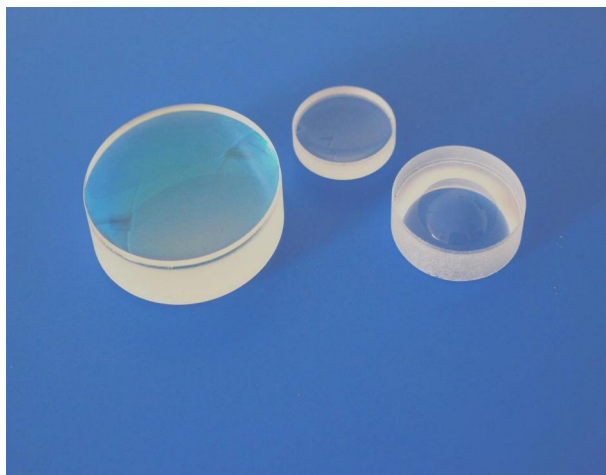

These lenses have considerably reduced not only chromatic aberration bust also spherical aberration and coma aberration designed with respect to three wavelength 480nm, 546.1nm and 643.8nm. They are best used in replacing singlet where ir performance is required.

Custom Made Capabilities :

Product Name	AR coating achromatic lens
Centering	<3 arc min
Thickness	3.0 mm
Diameter	24 mm
Back Focal Length	-10.96 mm
Clear Aperture	≥central 80% of dimensions
Surface Flatness	Lambda/4
Effective Focal Length	-6.4 mm

Center Thickness	6.0 mm
Surface Quality	60-40 scratch-dig
Material	optical glass
Coating	AR coating
Parallelism	3 arc seconds

Our Service :

1. We have a complete QC system, and regularly the quality on 24 hours.
2. We have a specialized foreign trade team, and can provide you the professional service.
3. We have several sets of production equipment, can meet the your delivery time in time.
4. We are factory, and can provide the cheap price for you.

FAQ :

Q1: Are you a factory or trading company ?

A: We are a factory. We have been in optics field for 20 years.

Q2: Can I customize the products based on my need?

A: Yes, we can customize the material, specifications and optical coating for your optical components based on your needs

Q3: Where is your factory located ? How can I visit there ?

A: Our factory is located in Nanjing City, Jiangsu Province, China. Warmly welcome to visit us !
