## Automation two head laser wire stripping machine best price

laser stripping machine

negotiable

**Model:** QA-FL20-2H

**MOQ:** 1

**Payment:** T/T

**Delivery Time:** 50-70days

**Warranty:** 1 Year

**Service:** Online service

**Certification:** CE ISO

## Automation two head laser wire stripping machine best price

### Overview

Cleaning-  
Machine-

It is a new application for wire stripping and cutting. The traditional processing for wire stripping is realized by wire stripping pliers or a knife. As a result that mechanical stripping might cause an extrusion and cutting force to wire core due to jaw contact, and such damage to the wire core. If the jaw does not touch metal wire, the insulation layer cant be cut cleanly. Regarding multi-layer composed of rayon knitted leather insulated wire, mechanical stripping is more difficult to meet the requirements.

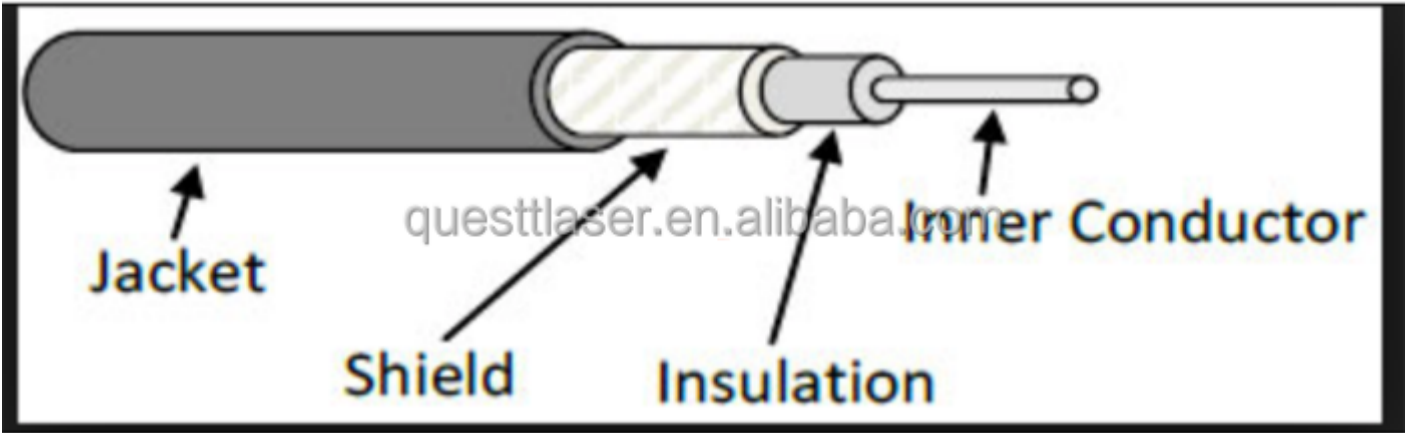

### Advantages

1. Its combined twisting and crimping machine together , and it save the time for transportation and conraposition
2. Its adopted imported servo motor and high precision ball screw, and the loading accuracy reach 0.01mm, it can accurately locate position of Twisting and Crimping High performance PLC controller with complete function,simple and convenient operation
3. It can assembled with our four head high precision laser stripper (<https://dp97e673.allweyes.com/laser-stripping>) and special harness processing technology, it will eliminate the traditional wetting process and directly crimping the harness and save a lot of time
4. Its more suitable for precision line;

### Parametes

Model	QA-C30-2H
Laser type	CO2 laser
Laser output power	30W
Wavelength	10600nm
Laser power adjustment	0~100%
Stripping speed adjustment	0~200mm/s
Repeating accuracy	±0.03mm
Cooling mode	Air cooling
Power supply	220(110)V/50(60)Hz/ 1.5kVA
Machine Size	1140×665×1115 (L×W×H)mm

### Wire stripping process

No.	Sequence	Equipment and Tool	Time cost	Worker	AUTOMATION
1	Arrange the cables	Human beings		4-5	We can supply the complete automation production line especially for your request.
2	Jacket strip	Twin head CO2 laser stripper	0.5s/cable	1	

Chat Online

3 (/)	Jacket remove	Remover	10s/bin	1
4	Shield cutting	Four head Fiber laser Striper	20s/3bin	1
5	Shield brush	Brush the shield	10s/bin	1
6	Insulation cutting	Twin Head CO2 laser striper	15s/3bin	1
7	Insulation remove	Remover	5s/bin	1
8	Inner conductor cutting	Four head fiber laser	1s/bin	1
9	1-10 repeat			

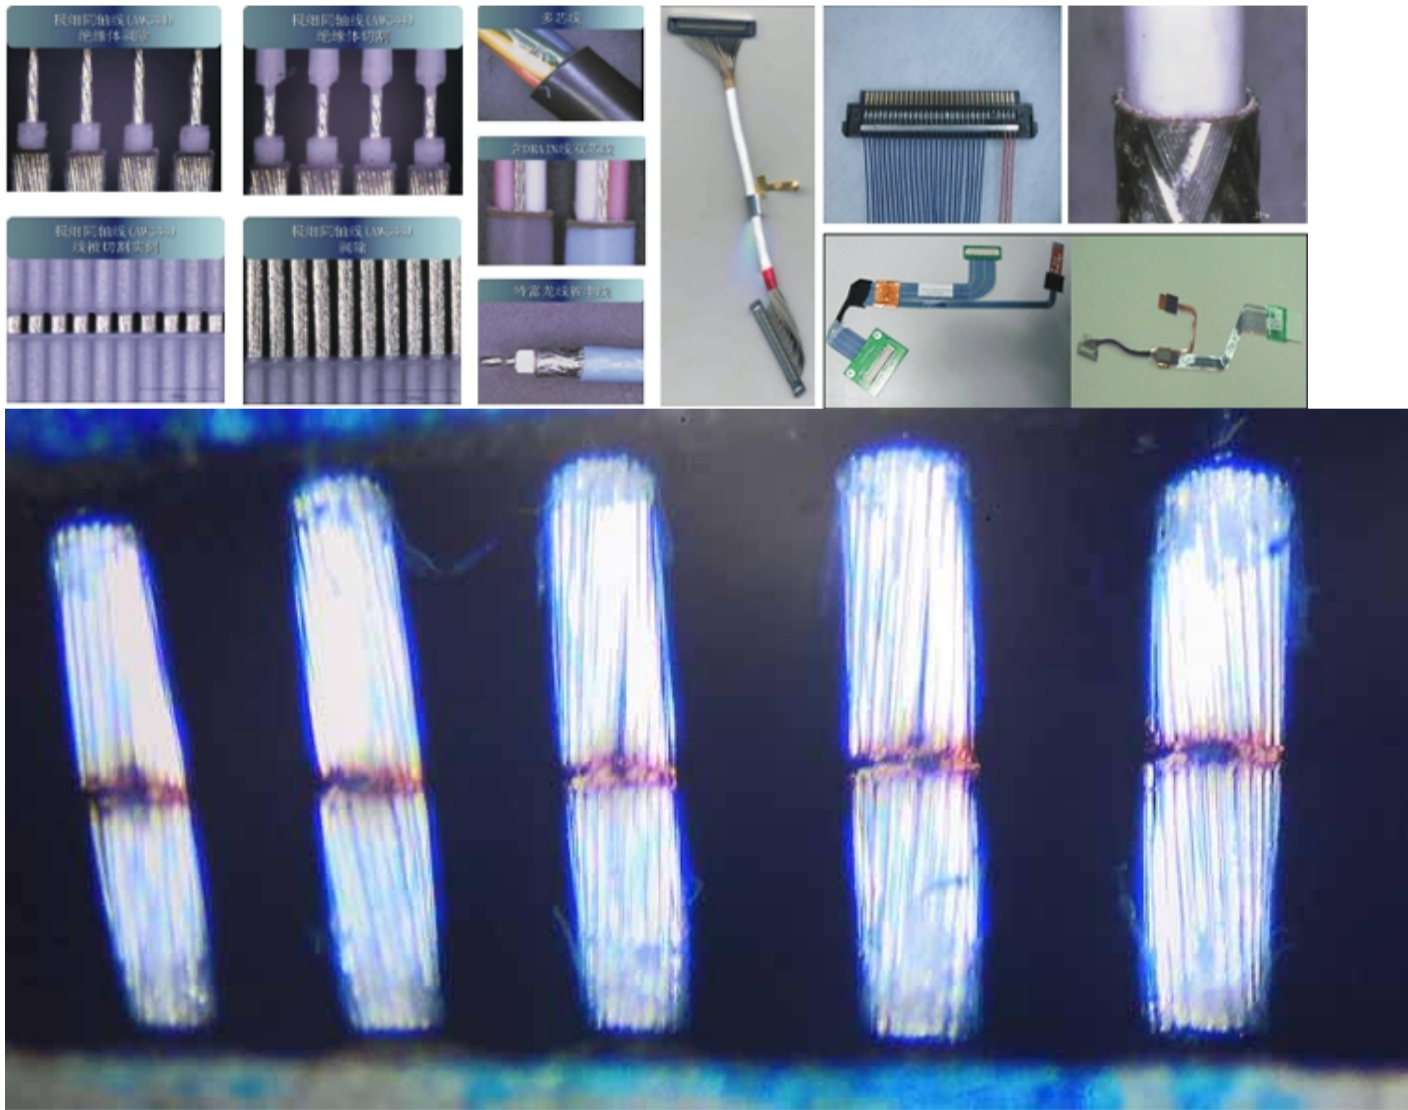

Striping working processing sequence

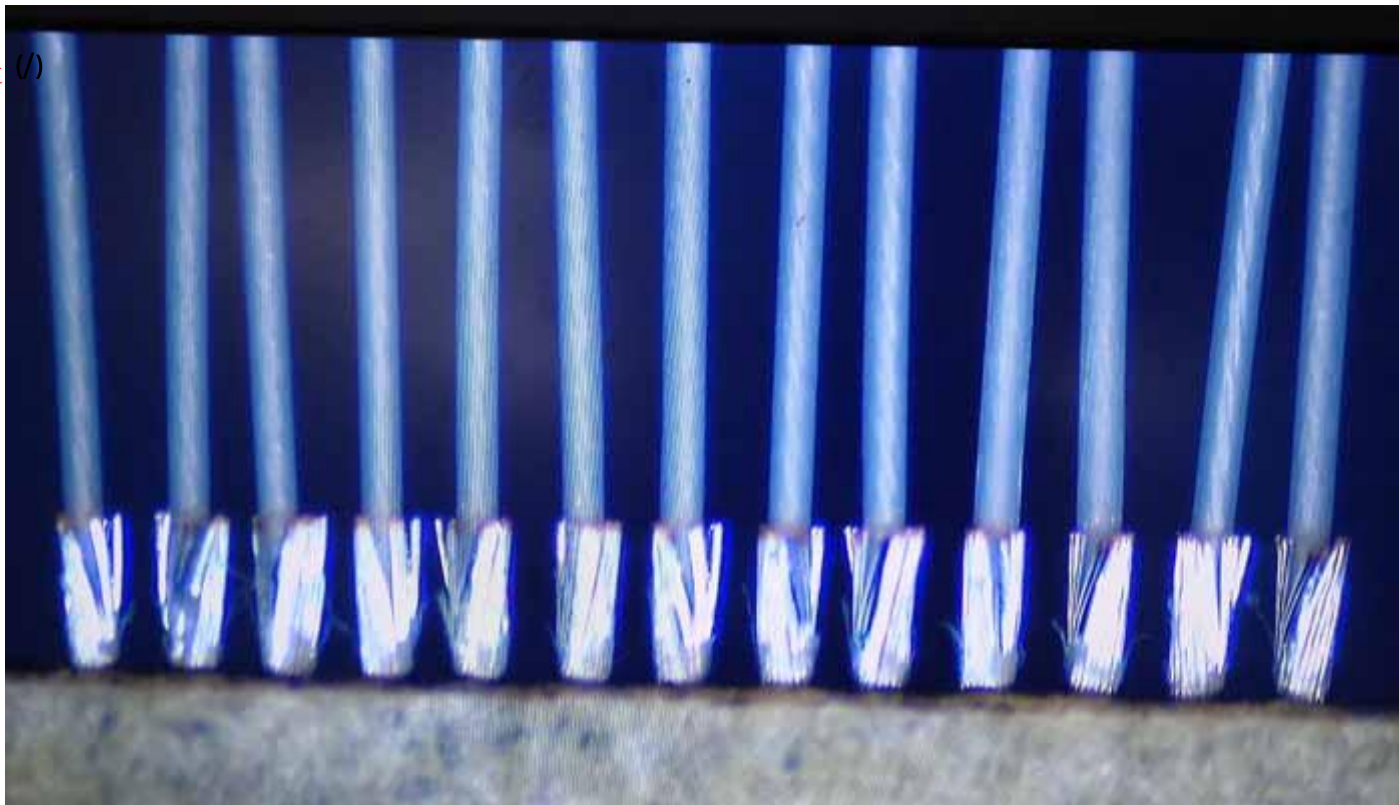

NO.	1	2	4	5	6	7	9
step	Jacket cutting	Jacket remove	Shield cutting	Shield Brush	Insulation Cutting	Insulation remove	Inner conductor cutting
Cable							
Machin e	CO2 Striper	Remover	Fiber striper	Brusher	Co2 striper	Remover	Conductor cutter

Applications

Automation two head laser wire stripping machine is suitable for stripping the internal lines of mobile phones, computers and Digital Microelectronics products. Peeling Single line, line, multi-layer line, etc., It is suitable for small data processing below 0.5mm Especially used for stripping the extremely thin coaxial line, does not need to turn the wires, and does not need to go to tin. It can clean the shielded wires clean and will not damage the insulators.

Sample

## Machine overview

## FAQ

1 Q: What is the warranty of the laser wire stripping machine (<https://dp97e673.allweyes.com/laser-stripping-system>)?

A: The warranty is 2 years, but we offer whole life after-sale service.

2 Q: What is your payment term?

A: T/T, L/C, Western Union, etc.

3 Q: What is your after-sale service?

A: Engineers can offer oversea services and we can also offer online service.

4 Q: How is the operation of the machine?

A: We offer operation manual and videos, show you how to operate the machine.

We can also send engineers to your factory for training.
