Product description

Carbon steel, stainless steel, aluminum metal sheet 63A, 100A, 120A, 160A and 200A cnc plasma cutting machine

Advantage of cnc plasma cutting machine:

1. The machine is all welded as seamless steel structure. Steady structure and long life time
2. High configuration, high cutting speed and precision.
3. Beijing START control system, Steady performance.
4. Cutting material: steel, copper, iron, aluminum, galvanized sheet, titanium plates, and so on.
6. File format: G-code
7. Suitable Software :ARTCUT, Type3, ArtCAM. FASTCAM

Main parts:

1. Plasma power supply, China made Huayuan brand or USA Hypertherm brand, below are the cutting thickness of different plasma power supply.

Plasma power supply	carbon steel cutting thickness	stainless steel cutting thickness
Hypertherm 45A	< 8 mm	< 5 mm
Hypertherm 65A	< 12 mm	< 8 mm
Hypertherm 85A	< 16 mm	< 12 mm
Hypertherm 105A	< 22 mm	< 18 mm
Hypertherm 125A	< 25 mm	< 19 mm
Hypertherm 200A	< 32 mm	< 25 mm
Huayuan 63A	< 8 mm	< 5 mm
Huayuan 100A	< 12 mm	< 7 mm
Huayuan 160A	< 25 mm	< 20 mm
Huayuan 200A	< 30 mm	< 22 mm

2. STARFIRE/START control system, all is ok , Chinese /English /RUSSIAN/Spainsh/French/Czech/Janpanese/Slovakian etc. version for your choose ,so you don't need worry about operate problem regardng language.

Automatic torch height controller, with this function , the torch can up and down with automatic regarding the sheet radian , so through your sheet is not flat , you also don't need worry the torch will collide the sheet , then to protect the cutting torch and ensure the cutting performance.

3). Sawtooth worktable, it can reduce the touch surface of table and metal sheet as much as possible.

Optional parts for more functions:

1). Rotary device for cutting metal pipe, diameter can be 200mm, 300mm, 400mm length can be same along with Y-axis.

2). Flame cutting head, it is easy to change these two heads, the flame head can cut 0-200mm carbon steel

3).with drilling head for cutting different size holes
