Detailed Product Description

Name:	Desk Plasma Metal Cutting Machine 1325	Control System:	Starfire SF-2100AH-QG
THC:	Start Microstep SH-HC30	Motor & Driver:	86 Stepper Motor & Leashine Driver M860H
Rail:	Hiwin NO 20 Square Linear Rails	Cutting Speed:	0-8000mm/min
Travelling Speed:	0-10000mm/min	Application:	Iron Sheet, Aluminium / Copper Sheet,galvanized Sheet,stainless Steel Plates,carben Steel Plates,wild Steel
High Light:	cnc plasma cutting table, plasm	a metal cutting macl	nine

Certification

Cnc Desk Plasma Cutting Machine 1325 For Cutting Thin Metals With HuaYuan

Descriptions of Cnc Desk Plasma Cutting Machine 1325 For Cutting Thin Metals With HuaYuan

QCP CNC Plasma cutting and flame cutting machine is a new type of thermal cutting equipment. It works by using a plasma arc (with compressed air) or a high-temperature high-speed flame (with oxygen + acetylene or propane) as a heat source to partially melt and cut metal simultaneously, then blow away the molten metal with a high-speed air stream so as to form a narrow slit. The machines not only have high cutting speed, narrow slit, flat cut, small heat affected zone, low deformation of the processing metal, simple operation, but also with remarkable energy saving and material saving effect.

- 1. QCP plasma cutting machines adopt high-quality cast steel to build gantry to make sure of rigidity and light weight structure, so the machines can move more stable , more smoothly and more precisely with less movement inertia, also prolong the lifespan of the motors greatly.
- 2. X and Y axis adopt Taiwan-imported Hiwin linear square rail and siding blocks, and Y axis is driven by dual-bigtorque motors, which make the machines moving more smoothly and precisely.
- 3. Professional STARFIRE 2100 controllor system as standard configuration:
- 1). STARFIRE system is designed to cut metals with plasma and torch 2 kinds of cutting-mode;
- 2). High reliability as well as good resistance to plasma disturbance, lightning and surge;
- 3). Applied torch/plasma cutting technology, able to perform corner speed control and height control automatically;
- 4). Kerf compensation, reasonability check and simulating operating;
- 5). Breakpoint restoration, automatic power-back recovery and automatic breakpoint memory if electrical powering break;
- 6). Random section and piercing point selection;
- 7). Extended piercing for thick plate and bridging feature for thin plate;
- 8). Optional piercing position feature in mode of RETURN, SECTION(return, section) and RESBREK(breakpoint restoration), very convenient for user control;
- 9). Ready for transitional cutting operation at any moment;
- 10). Special short line machining feature based on smooth travel, extensively applicable to metal blanking as well as advertisement and ironwork fabrication, etc;
- 11). 24-type-part patterns in LIBRARY including the common machining parts, extensible and customizable and with auto-nesting function;
- 12). Compatible with many professional nesting softwares such as IBE(Germany), FASTCAM, etc;
- 13). Interface language can support English, Russian, Spanish, French, Czech, Japanese and Slovankian, also it can be customized to other language;
- 14). 7" colour-screen with dynamic graphic display, 8-times zoom, free point automatic tracking;
- 15). Using U disk read,edit ,operate the file and upgrading the controlling-software easily.
- 4. Professional THC START Microstep SH-HC30 can adjust plasma-cutting torch up and down automatically to keep fixed distance with the metal plate ,so the plasma torch can cut unflat metal plate safely and quickly. The working way of THC is based on the characteristics of constant current of plasma power generator and checking the arc voltage of plasma power generator to control the torch height momentarily.
- 5. Plasma torch can cut the 0.1-30mm metal sheet with plasma power generator. (The exact cutting thickness depends on plasma power generator, please see the Cutting Thickness in the following.) This machine is with waterpump and water pipe, which are provent the metal from heat-transformation.

Flame torch can cut the 5-200mm metal sheet (cutting speed 0--1000mm/min) with oxygen + Propane or acetylene. (There is no plasma power generator for flame cutting.) Flame cutting device is for optioal.

Applications of Cnc Desk Plasma Cutting Machine 1325 For Cutting Thin Metals With HuaYuan

QCP plasma cutting machines are widely used to cut iron sheet, aluminium / brass / copper / titanium / nickel sheet, galvanized sheet, stainless steel plates, carben steel plates, wild steel, alloy steel and almost all metal plate and pipes (needs rotary device for pipes-cutting) with fast working speed, high precision and low cost.

Machine technical parameters of Cnc Desk Plasma Cutting Machine 1325 For Cutting Thin Metals With HuaYuan

I. Basic Configuration Technical P	arameters				
Machine package dimension & weight		2280mm×3300mm×1700mm 1100KG			
Effective cutting size		1300mm×2500mm			
Plasma cutting torch with water-cooling		lame-cutting torch as for optiona	al)		
for thin metal					
Plasma cutting thickness		ing to plasma generator			
The cutting torch height		≤170mm			
Cutting speed		mm/min	THC current set on		
	'	ds on metal thickness,arc set on ı generator)	THO, current set on		
Travelling speed		Omm/min			
II. Critical Parts List					
Name	brand 8	& specifications	set		
Plasma machine frame		duty frame with 4.5mm	1

Our service

- 1. The company who initially provide 3 years warranty in the world;
- 2. 24-hour full after sales service;
- 3. All finished machines we delivered are 100% strictly tested by our QC department and engineering department and sending working zamples together with machines;
- 4. OEM Service Customized and OEM orders are welcome due to our abundant experiences. All the OEM services are free.
- 5. Standard Package List as below:

QCP 1325 plasma cutting machine	1 SET
Plasma generator according to your need	1 SET
Nozzles and electrodes	Hypertherm: 2 sets
	(HuaYuan :10 sets)
Smoke-ventilator	1 SET
Foot-pads	6 SETS
Australian FastCAM software with dongle	1 SET
Proximity limit (as spare part)	1 PIC
Allen wrenches	1 SET
U DISK (operating manual and videos)	1 PIC
Cutting zample	1 PIC (as your requirements)

About us

Q1: How about warranty?

A1: 36-months quality guaranty, the machine with main parts(excluding the consumables) shall be changed free of charge when if any problem during the warranty period. After 36-months warranty, we II offer all the parts with the agent price.

We offer lifetime technical supports, afterservice person in charge :Skype / whatsapp/ Wechat/ Tel: +8613176441785 Carol zhu.

Q2: What's the delivery time?

A2: 10-15 working days to delivery port.

Q3: What's the usually delivery terms?

A3: FOB, CIF, DDP, Exworks will be OK.

Q4: What's the MOQ?

A4: 1 set.

Q5: What's the delivery port?

A5: Usually Qingdao port, also we can deliver machines to Shanghai port and Guangzhou.

Q6: What's the packing?

A6: Iron Pallet and export- standard Plywood cases .

Q7: Can I change the motor to my local voltage and frequency, Is there any extra charge?

A7: Yes, we can supply motor ,all parts and components with your local frequency and voltage, such as 220V/380V/410V/415V/440V, and 50HZ/60HZ with no-profit charge.

Q8: Can you place OEM orders?

A8: Yes,OEM orders are acceptable. We can manufacture machines according to your requirement with your design,logo,color,materials or brand information.

Q9:Where is your factory located? How can I visit there?

A9:Our factory is located in JiNan City, Shandong Province, China, about 2 hours from Beijing, 3.5 hours from Shanghai and 10 hours from Guangzhou by high-speed train.
