

CNC Plasma Cutting Machines

Leading Manufacturer of cnc pipe profile cutting machine, cnc profile cutting and drilling machine, cnc plasma cutting machine, portable profile gas cutting machine, cnc plasma profile cutting machine and stainless steel plasma cutting machine from Pune.

Approx. Price: **Rs 20 Lakh / Unit** [Get Latest Price](#)

Product Details:

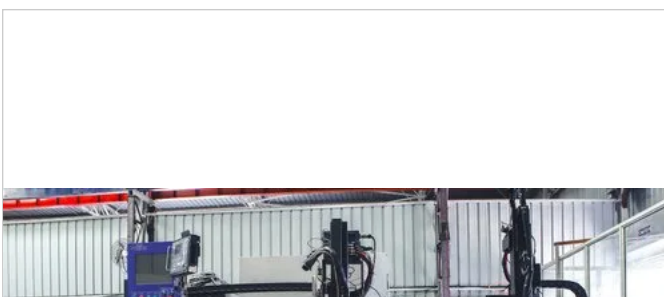

Cutting Method	Plasma
Positioning Speed	0 - 12000 mm/min
Effective Cutting Width	1.25 - 8 m
Pipe Diameter Range	50 mm to 200 mm
Effective cutting length	Infinite - Modular rails ensure long lengths for the machine
Pipe Clamping	Manual,Pneumatic,Hydraulic
Idler Support	At equal intervals depending on length of pipes
Model	PipePro

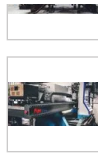

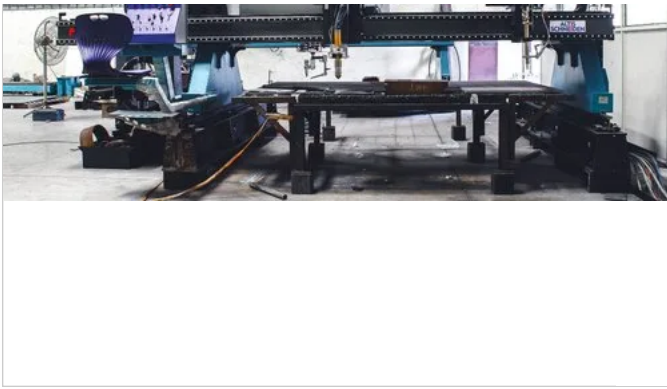

PIPEPRO offers comprehensive solution to a customer's plate and pipe cutting requirement. The same oxy fuel/plasma head does both, the pipe and plate cutting thereby reducing costs and increasing flexibility.

Features:

- The highly robust and rigid mechanical structure
- Excellent cut quality and lower operating costs
- Advanced control system with the touch-screen interface
- Air-conditioned control panel ensures high reliability of electronics even in harsh workshop conditions
- Useful for medium to heavy-duty cutting
- Designed for 24x7 working with minimum down-time
- Easy to operate GUI ensures less setup time and quicker turnaround time
- Marking options such as punch marking, power marking and plasma marking available
- Various edge-preparation facilities available in gas and plasma cutting

CNC PIPE Profile Cutting Machine

Get Best Quote

- The modular design ensures machine length can be increased in the future
- Longitudinal axis motion is guided by heavy-duty machined railway rails
- Self-centering jaws enable quick setup time
- Manual, pneumatic or hydraulic clamping based on the pipe diameter and weight
- Profile cutting on pipes through the synchronized rotary motion of chuck and motion
- Easy switchover on controller between pipe and plate cutting

Approx. Price: **Rs 30 Lakh / ONWARDS** [Get Latest Price](#)

Product Details:

Machine Type	Automatic
Model Number/Name	Plate Maestro
Drilling capacity	10 mm to 50 mm
Drilling spindle	BT30,BT40,BT50
Effective cutting length	4 m to 30 m
Effective cutting width	1.5 m to 4 m
Positioning speed	0 - 12,000 mm/min
Process	Gas Cutting,Plasma Cutting,Drilling,Tapping

PLATE MAESTRO is a plate processing machine that combines drilling, tapping and plasma cutting processes. Eliminates large setup times involved in drilling operation by drilling holes based on CNC program and then cutting components through plasma cutting process.

Features:

- The extremely heavy-duty, robust and rigid mechanical structure
- Structure designed to counter deflection and heavy axial loads during the drilling operation
- Designed for high acceleration and deceleration required for the plasma cutting process
- Easy changeover between drilling and cutting processes
- Designed for high-speed and carbide drills
- Coolant filtration and circulation system

- The magazine for holding different drill and tap tools along with automatic tool changeover mechanism
- Easy to operate GUI ensures less setup time and quicker turnaround time

Approx. Price: **Rs 18 Lakh / ONWARDS** [Get Latest Price](#)

Product Details:

Model Number/Name	ProfiCut
Brand/Make	Pro-Arc
Cutting Method	Plasma
Positioning Speed	0 - 10,000 mm/min
Effective Cutting Width	1.5 m - 3 m
Effective cutting length	3 m to 16 m
Cutting Thickness	0.5 - 50mm MS by plasma cutting, 1 - 32mm SS by plasma cutting

PROFICUT model offers quality cutting at affordable rates. The economical price of the PROFICUT model makes it an attractive proposition for small and medium sized industries with low to moderate volume of cutting.

Features:

- Technologically advanced, moderately priced
- Low on maintenance & Easy to use
- The highly robust and rigid mechanical system
- Longitudinal axis motion over elevator rails
- Laser pointer for automatic plate alignment
- Anti-collision system for protecting plasma torch from damage during the collision
- Commonly offered with Powermax and MAXPRO200 plasma systems of Hypertherm
- Dual synchronized servo drive system for long axis motion

Portable Profile Gas Cutting Machine

Product Price :

Product Details:

Automation Grade	Automatic
Brand	Pro arc
Length	3 m to 20 m
Cutting Speed	0 - 10,000 mm/min
Cutting Thickness	0.5 mm - 50 mm MS by plasma cutting 1 mm - 32 mm SS by plasma cutting 6 mm - 150 mm MS by gas cutting
