Why choose CNC Router Cutting?

Milling

Materials can be milled down to specific depths.

Thickness

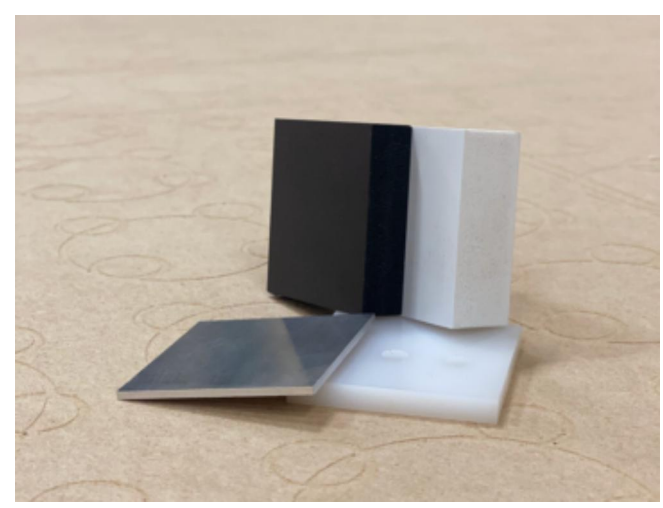

The thickness of certain materials can be increased when using a CNC compared to a laser cutter. However has different results with a round tool on interior cuts.

More Options

Our laser cutters can't cut through certain materials like aluminum, HDPE, polycarbonate and PVC so our CNC expands our abilities to cut them and more.

Common CNC Router Cutting Materials

Acetal
Acrylic
Corian®
Foam

HDPE
MDF
MDO
Non-Ferrous Metals

Polycarbonate
PVC
UHMW
Wood
