HONEYCOMB CUTTING PLATE

The laser honey comb cutting plate is a must for anyone who owns a laser engraving and cutting machine. The size of the work bed 400*400*22mm(15.75*15.75*0.87inch)/600*590*22mm(23.6*23.2*0.87 in.) For D1, Ortur, Sculpfun, NEJE, CV-01,D1,D1 Pro, Atc It helps reduce the smoke damage underneath a plank when laser cutting.

Our laser honeycomb beds are well protected against damage to the worktop. A stainless steel mat is placed under the honeycomb protect the table surface from the laser beam. Allows very nice clean cuts with wood acrylic, plastic, etc.

It is compatible with almost all common diode laser engravers and CO2 laser engraving machines on the market.

Perfect for the Comgrow Z1!
I purchased this to replace the smaller 400x400 size bed that I originally ordered. The small one works, but the larger one is much nicer to work with. The aluminum underneath is great for protecting the bench top, and helps catch the tiny pieces that fall through the honeycomb when cutting out holes and tabs in small parts. I highly recommend getting the larger size. It's much easier to set the whole laser on top of the bed and not worry about needing to align the bed.
