2. Eyes Protection Design: Fire retardant laser enclosure can diminish the blue light produced by laser engraving, protecting your eyes.

3. More Secure During Engraving: The interior uses flame-retardant material, which can effectively stop burning. It can isolate the smoke and odor generated during the laser engraving process.

4. Quick and Easy Installation: Folding storage, easy to carry and assemble, stainless steel bracket, the overall more stable. It has 2 exhaust ports (100mm/4inch diameter) on the back for DIY filter & fan.

5. Enclosure Advantage: Sound insulation and dustproof. The cover can effectively block the noise emitted by the engraver during laser engraving, creating a comfortable engraving environment. It can also be used as a dust cover to prevent the engraver from being covered by dust. Simply wipe it with a damp cloth when cleaning. Protects laser engraver from damage and helps contain stray fumes.

Comgrow Laser Enclosure(Medium)
I recently purchased 2 Comgrow Laser enclosures (Medium) for my lasers. I purchased one from the Comgrow site and the other from Amazon. Fantastic product, easily assembled and functions as promoted. One week after purchasing the first I bought another laser and then my 2nd Enclosure from Amazon. The second one had a much brighter Led light, as for the first one from Comgrow store was very dim. Which leads me to wonder if there is a replacement policy for the bad led on my first order from Comgrow

I would appreciate your assistance in this matter and thank you for your efforts.

Best enclosure for the money
I watched several video and it was an easy decision to purchase the 700x700x500 enclosure for my 400x40 engraver.

Great product
This works well with my Ortur Laser masrer 2. Very happy with it and I would recommend it to anyone I know looking for laser enclosure.

Loving It
great product, love the enclosure, glad I went with the larger one.
