Economical Portable Cnc Flame Plasma Cutting Machine For Metal Sheet

Product Details:

Place of Origin:	China
Brand Name:	Metalwork
Certification:	CE, ISO, CCC
Model Number:	CNC1-1530P

Payment & Shipping Terms:

Minimum Order	1 set
Quantity:	
Price:	Negotiable
Packaging Details:	Plywood box
Delivery Time:	40 days
Payment Terms:	L/C, T/T
Supply Ability:	100 sets per month

Detailed Product Description

Plasma Source:	USA Hypertherm Or China Huayuan	CNC System:	Shanghai Fangling-2100T
File Transmission:	USB Transmission	Processing Materials:	Iron, Steel Aluminum Sheets, Galvanized Sheets, Titanium Plates, Other Metal
Key Selling Points:	High Productivity	After-sales Service Provided:	Engineers Available To Service Machinery Overseas
Warranty:	1 Year,12months		
High Light:	cnc steel cutting machine, plasma metal cutting machine		

Economical Portable Cnc Flame Plasma Cutting Machine For Metal Sheet

Product description:

Portable CNC portable plasma or flame cutting machine can be programmed to cut any plane shape parts composed of beeline and arc, which are same as large gantry cutting machines. It is equipped with A inch LED with dynamic and static graphical display. It is directly perceived and very easy to learn. It can be programmed to cutting parts directly, and also can be operated in computer translating instructions into a program file by CAD program, and then deducing it via U hardware. The standard positioning of this machine is flame cutting, external hanging plasma cutter is also workable.

Main technical specification:

Effective Cutting Range:	1500*3000mm
Max. Return Speed:	3000mm/min
Flame Cutting Thickness:	5~120mm
Plasma Cutting Thickness:	Depend on Plasma
Power Supply Voltage:	220V
Frequency:	50Hz
Rated Power:	0.24LW

Oxy Max Pressure:	0.7MPa
Gas Max Pressure:	0.1Mpa
Cutting Shape:	any shapes
Cutting Mode:	plasma and flame
Drive Mode:	single-side
Control accuracy:	±0.01mm

Products advantages:

- 1) Portable CNC plasma or flame cutting machine is an integrally compact mini structure and is an ideal updating and upgrading product for replacing handheld flame cutting equipment, handheld plasma cutting device, profiling cutting machine and semi-auto cutting trolley.
- 2) Operated easily and flexibly.
- 3) Without any fixed site and with random moving.
- 4) It is applicable to inside or outside cutting.
- 5) Able to cut off various metal materials of any graphs.
- 6) Good finish. In general, There is no need to process surface further after cutting.
- 7) It is provided with advantages such as high automation, easy operation, high accuracy, high reliability, low price, and simple operation & maintenance and so on.

Product details:

Product application:

CNC plasma or flame cutting machine is now widely used in industries such as machine tool manufacturing, Petro-chemical equipment, light-industrial machinery, shipbuilding, pressure vessel, mining machinery, electric power, bridge construction, aerospace, steel structure etc..

Why choose us?

- 1) We specialized in the production and sales of CNC cutting machine.
- 2) We are gold suppliers of this industry.
- 3) We have a professional sales and service team.
- 4) Our products, quality guarantee, CE certificate, they are exported to many countries around the world. Such as Singapore, Australia, Mexico, France, Philippines and so on.
- 5) Metalwork grants 12months warranty and during it once any defect of spare parts in normal operation, the defective part will be repaired or replaced free of charge.

Packaging details:

The normal package is wooden box made of plywood,so it does not need any fumigation or phytosanitary.

package

plywood box

Tag: cnc metal cutting machine, plasma metal cutting machine, cnc steel cutting machine
