#### Class 1 laser safety marking system

The FIBER LASER XL laser marking workstation guarantees users a full level of protection against potential risks while operating the laser marking process.

#### Easy operation

The FIBER LASER XL incorporates a wide vertical opening front door for easy access to the large interior workspace, making it very easy to load parts of virtually any size.

#### Door open security sensor

The I/Door sensor security system automatically stops the marking process if the door is opened, ensuring that marking is only possible if the door is completely closed.

#### Powered Z-Axis

The FIBER LASER XL is equipped with a motorized Z-axis that allows easy marking distance adjustment for the different part sizes.

#### Affordable cutting-edge technology

The FIBER LASER XL workstation is a top-level fully configurable laser marking solution at a highly competitive, affordable and comprehensive price
